## **Agricultural Website:**

**“MahaSetakariKalyanaSanghatana.com”**

### **Abstract**

The main objective of this project is building a website which will help farmers in Maharashtra to make the effective cultivation by providing up-to-date information and make a path to earn more money from villages in Maharashtra.

Information and communication have always mattered in agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have sought information from one another. Where can I buy the improved seed or feed this year? Who is paying the highest price at the market? How can I participate in the government's credit program? Where can I get today's market rates? How can I get latest news? Which are the new businesses? Producers rarely find it easy to obtain answers to such questions, even if similar ones arise season after season. Farmers in a village may have planted the “same” crop for centuries, but over time, weather patterns and soil conditions change and epidemics of pests and diseases come and go. Updated information allows the farmers to cope with and even benefit from these changes. Providing such knowledge can be challenging, however, because the highly localized nature of agriculture means that information must be tailored specifically to distinct conditions.
